EIZO Security & Surveillance Visual Solutions

Security solutions and services are needed to protect people, communities, and businesses, as well as help keep day-to-day functions running smoothly. EIZO's security & surveillance solutions facilitate the visual monitoring of information to help ensure a secure environment and streamline operations. The full lineup covers capture, image optimization, encoding & decoding, recording, and display to support a wide range of applications.

Capture	Image Optimization	Transmission	Recording	Decoding	Display
					
SSZ-9700	EVS1VX	EIZO's IP Encoder	EIZO's Video Network Distribution System	DX0212-IP	DuraVision / FlexScan

IP Decoding Solutions

EIZO's IP decoding solutions include 23, 27, and 46-inch monitors, as well as an external box solution, that connect to multiple IP cameras via switch with just a LAN cable to display surveillance video.

**DuraVision

27" and 23" IP Decoding Monitors

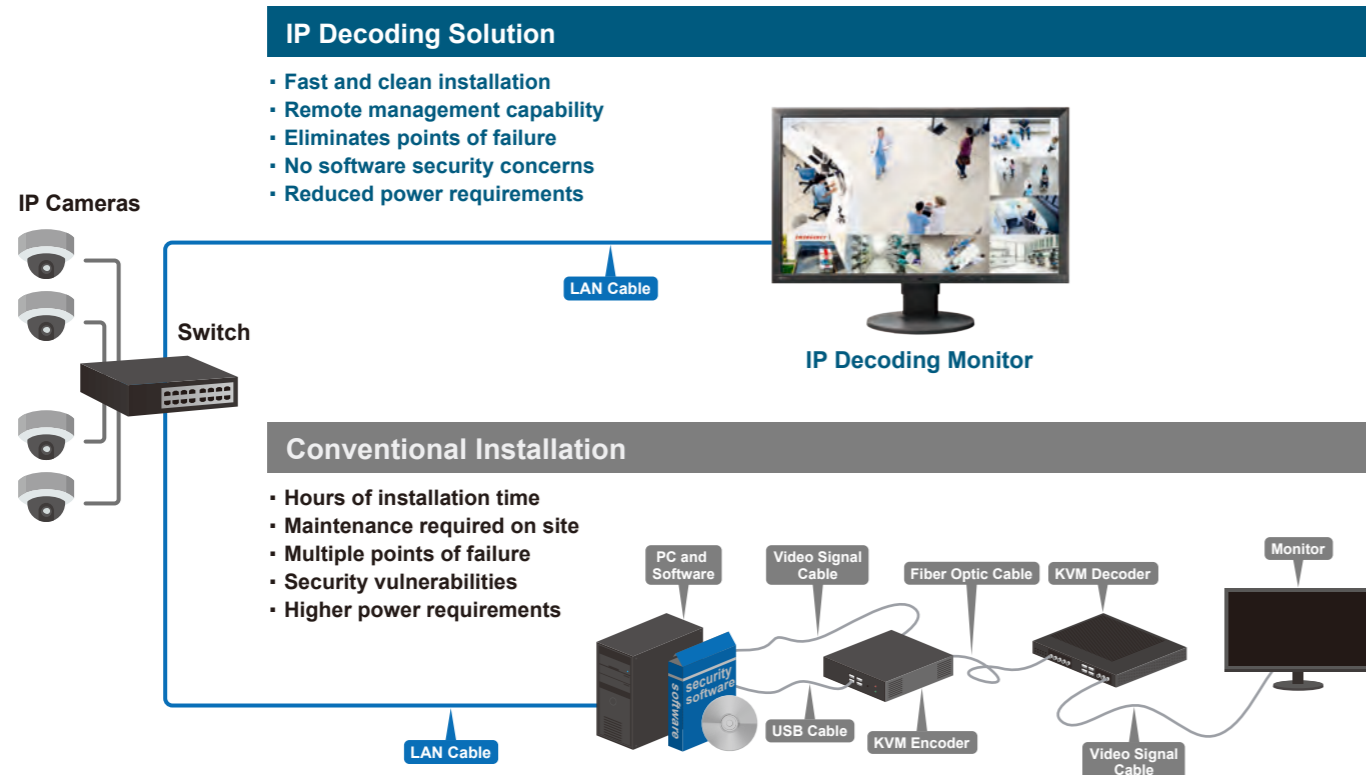

**DuraVision
FDF4627W-IP**
46" IP Decoding Monitor

- ✓ Interoperable with over 300 cameras
- ✓ Register up to 48" IP cameras, including 4K cameras
- ✓ Decodes H.265 (HEVC), H.264, and MJPEG codecs
- ✓ Display up to 32 screens simultaneously
- ✓ Live streaming directly from IP cameras without recording / storage

Save Time and Labor with PC-Less Connection

EIZO's DuraVision IP decoding solutions connect directly to an IP camera or switch to immediately begin streaming video. They do not require a PC, software, or other hardware to operate, greatly simplifying installation and saving on time and labor costs. This also eliminates several potential points of failure and addresses security concerns typical of a conventional setup by heavily reducing the amount of equipment needed to manage sensitive visual data.

Flexible Viewing with Multi-Monitor Capabilities

EIZO's 23- and 27-inch IP decoding monitors are equipped with an HDMI® output connector that supports connection to a second monitor up to Full HD resolution. EIZO's IP decoding box is equipped with two HDMI output connectors that support 4K UHD on up to two monitors. These options enable users to view footage on more than one screen for an optimal multi-monitor environment.

Not applicable to FDF4627W-IP.

Wide Range of IP Camera Support

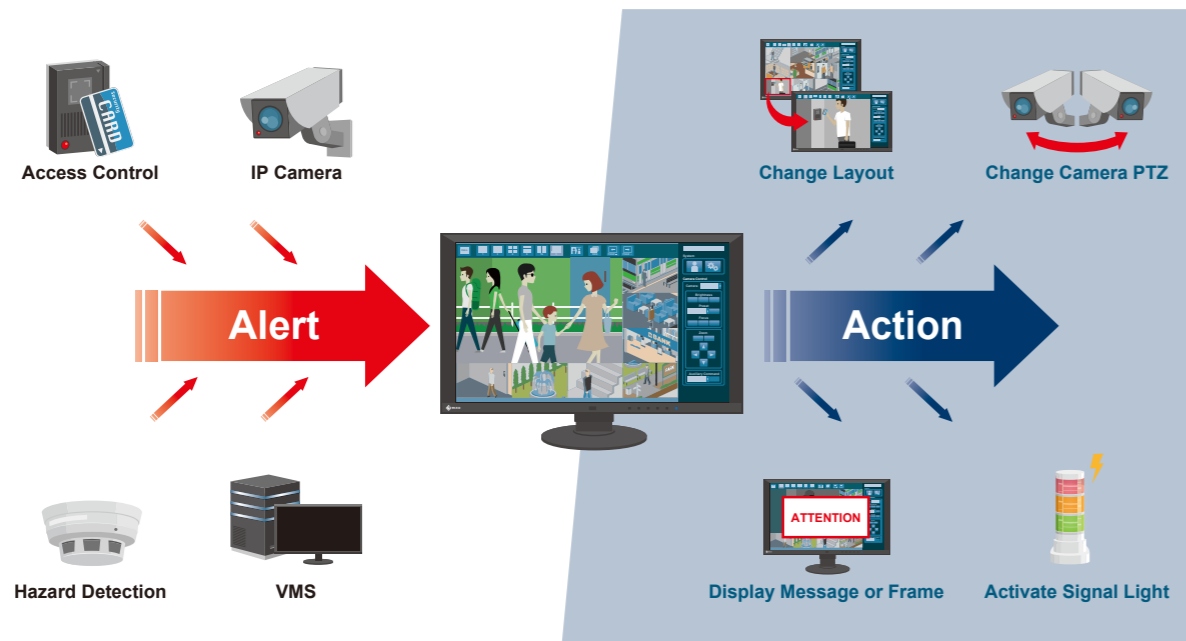

DuraVision IP decoding solutions support cameras with ONVIF® Profile S, Axis VAPIX, Panasonic, and i-PRO protocols for flexible installation and ensured interoperability with a wide range of products. In addition, a direct connection through RTSP is available (Direct URI).

FDF2312W-IP can register up to 16 IP cameras (standard) or 48 cameras (Enterprise License). FDF4627W-IP can register up to 16 IP cameras only. See EIZO's website for camera compatibility. FDF4627W-IP does not support H.265.

See What You Need, When You Need It with Alert-to-Action

EIZO IP decoding solutions support custom integration with local security systems and devices. When an event occurs and an alert is sent from IP cameras, access control, hazard detection, VMS, or other systems, EIZO's IP decoding solutions respond with a preassigned action, such as layout adjustment, message display, audio activation, camera adjustment, masking, and more.

See how Alert-to-Action works in these environments.

Hospitals

Nurse station support, critical patient monitoring, facility safety, service disruption mitigation, asset protection, and emergency response.

Railway Transit

Crowd management, patron flow, incident response, area safety, object and vehicle detection, depot and cargo area protection.

Factories

Manufacturing abnormality detection, machine status monitoring, hazard mitigation, equipment and asset protection.

Enhance Your View with Customizable Visual Settings

Sequential Screen Lock

When using the sequential image display setting, users can select an image to remain static, even through page changes.

Virtual Line

Virtual lines and shapes can be applied to the screen to track barriers and designated zones. Up to 10 objects can be applied and do not alter the source stream.

Privacy Mask

Users can assign static privacy masks to hide sensitive information on the live video stream without altering the source stream.

Camera PTZ Control

Operators can easily control individual camera PTZ settings using the buttons displayed over the selected video stream.

Advanced Operation with Enterprise License

Users can subscribe to an optional Enterprise License which includes advanced features to meet specific environment or application requirements.

- Playback recorded video
- View remote monitor live streams via the web UI
- Live image menu customization
- Screen rotation support
- VMS failover
- SRT, LDAP, AXIS SRTP protocols

VMS Integration

Centralize Tasks with Fully Integrated Solutions

EIZO's cooperation with leading security & surveillance solution providers ensures technical compatibility and optimized functionality of DuraVision IP decoding solutions with various VMS systems. This makes EIZO solutions ideal components in the greater security infrastructure for IP video playback.

VMS Partners

Centralized Management

IP decoding solutions, for example, can be controlled and monitored directly from the VMS interface, streamlining the installation process and operation. This includes the registration of cameras, remote status checks, and adjustments to the video layout and display. Display settings and options can also be easily configured via the VMS without having to access the monitor's user interface separately.

Control monitors remotely

Drag-and-drop cameras to monitors

Dynamic alert response

Co-Development of User-Requested Plugins

EIZO came together with leading VMS makers to design plugins to meet highly requested end user requirements. By fully integrating into these VMS frameworks, users can easily setup, manage, and command EIZO's IP decoding solutions from a centralized platform.

Image Optimization System

Create a Visual Advantage

The DuraVision EVS1VX and EVS1VS are image optimization systems that analyze and process images in real time to improve visibility for environments with specialized needs.

- ✔ Enhances visibility in real time
- ✔ Analyzes and adjusts images pixel-by-pixel for preserving details
- ✔ Optional features suited to various environments

Optimize Hard-to-See Images

EVS1VX and EVS1VS detect areas of the image that are difficult to see due to low lighting conditions, haze, or noise and enhances them to be more visible.

Image enhancement functions vary between models. See page 13 for details.

Improve Visibility in Low-Lighting Conditions

Distinguish Details in Color Dominated Images

OFF

ON

Image Optimization System

Choosing the Right System

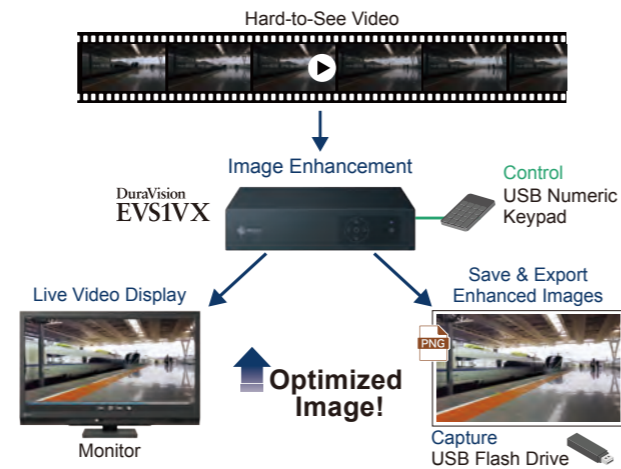

Multiple Display Modes

The EVS1VX can register up to 10 display modes, including custom modes.

Capture Stills Directly to USB

The EVS1VX allows operators to capture stills from any enhanced scene and save them directly to a USB flash drive. Captured stills inherit currently set image enhancements so they can be used for secondary review or for investigative purposes.

Create a Visual Advantage with EIZO Image Optimization Systems

Human-Centric Surveillance Systems

Facilitate Visual Inspection

- Crime Prevention & Fault Detection
- Infrastructure Maintenance Support
- Reduced Risk of Human Error

AI-Enhanced Security Systems

Facilitate AI Video Detection

- Crime Prevention & Fault Detection
- Infrastructure Maintenance Support
- Operator Workforce Optimization

EVS Image Optimization Utility

Make fine adjustments to display modes with EIZO's proprietary EVS Image Optimization Utility and maximize footage clarity with enhanced contours, contrast, and brightness.

EVS Image Optimization Utility is free of charge. Requires connection to a PC via USB (cable not included).

Local Image Enhancement

With the EVS Image Optimization Utility, you can custom select a specific area of the screen to apply image enhancement. This allows you to stay focused on regions of interest or limit image enhancement to only areas that require it.

Total Imaging Solution for Security

EIZO offers a total imaging solution with the EVS1VX used together with the SSZ-9700 ultra-high sensitivity HD zoom camera and any FlexScan monitor equipped with an HDMI connector.

See pages 14 - 15 for ultra-high sensitivity HD cameras. See pages 18 - 19 for FlexScan monitors.

Image Optimization System

Capture True Images Hidden by the Dark

The SSZ-9700 and SSC-9700 are ultra-high sensitivity HD cameras that capture color images even under extremely dim lighting conditions. This provides clearer imaging in dark environments or poor weather conditions compared to a standard video camera.

SSZ-9700 / SSC-9700
Ultra-High Sensitivity HD Cameras

- Unique 2D / 3D noise reduction
- Defog function for increased visibility
- HDR function for combining multiple exposures
- Seamless integration with surveillance systems

High-Sensitivity Color Capture in Low-Lit Environments

The cameras captures color images, even under extremely dim lighting conditions as low as 0.004 lx or 0.003 lx for the SSZ-9700 and SSC-9700 respectively. This provides clearer imaging in dark environments or poor weather conditions compared to a standard video camera.

Pictured: Dam Water Level Surveillance
Time: After Sunset / Weather: Cloudy

Pictured: Riverside Surveillance
Time: After Sunset / Weather: Cloudy

Optical Defog

Optical Defog increases visibility by capturing images in the infrared region so objects become more discernible to the human eye.

SSC-9700 does not support Optical Defog.

Digital Defog

Digital Defog stretches the contrast using image signal processing to adjust the difference in brightness and color for increased clarity of faint images.

Up to 350x Maximum Zoom Ratio

The SSZ-9700's built-in 35x optical zoom lens covers a focal length range of 6.5 to 230 mm and a 2.12 megapixel, 1/1.8 inch CMOS sensor. Combining 35x optical zoom and 10x digital zoom allows you to achieve a maximum zoom ratio of up to 350x (f=10,500 mm in 35 mm equivalent).

When using digital zoom, resolution is lowered. SSC-9700 does not include a lens.

Total Imaging Solution for Security

The SSZ-9700 when used with EVS1VX and any FlexScan monitor equipped with an HDMI connector provides a total imaging solution with high visibility for security & surveillance.

Touch Panel Monitors

Highly Responsive Touch for Intuitive Operation

Touch panel monitors are frequently used to provide services and information in a range of environments. EIZO's lineup of touch panel monitors covers multiple touch technologies and feature sets to suit security and other applications.

- ✓ Fully flat design for seamless touch operation
- ✓ Multi-touch interface
- ✓ High visibility and clear display
- ✓ Long-term reliability with a 3-year warranty

PCAP Touch Panel Monitors

DuraVision monitors with projected capacitive (PCAP) touch technology accept touch input from a bare finger or stylus. They can detect up to 10 simultaneous touches for easily operating applications. High responsiveness to tapping, swiping, and flicking motions makes touch operation intuitive and smooth.

SAW Touch Technology

For environments that require the use of gloves, DuraVision monitors with surface acoustic wave (SAW) technology provide intuitive touch operation. They support 2-point multi-touch and accept touch input from styluses.

Touch Technology Characteristics

	Simultaneous Touch Points	Response when Wearing Gloves	Stylus Input	Slide Motion Response	Touchscreen Durability	Unintended Input from Fluid/Dust	Transmission Rate (Visibility)
Projected Capacitive (PCAP)	1 to 10 (varies by model)	Low ¹	Yes ²	Yes	Glass	High Resistance	High
Surface Acoustic Wave (SAW)	1 or 2 (varies by model)	Yes	Yes ³	Low	Glass	Low Resistance	High

¹ Only responds with thin or specialized gloves. ² Requires active stylus or capacitive stylus pen. ³ Responds best to soft, broad-tipped stylus or pointer.

Monitors for Operations Centers

Extensive Range for Meeting Diverse Requirements

In addition to the highly specialized visual solutions for video surveillance, EIZO also offers a broad lineup of monitors optimal for security operations centers and administrative areas with its FlexScan series. With a wide range of sizes, resolutions, and feature sets, EIZO is able to meet the diverse requirements of any installation.

- ✓ Range of connections including USB Type-C® and legacy inputs
- ✓ Slim bezels for seamless multi-monitor configuration
- ✓ Eye care technology and ergonomic design

Available features vary by model. Contact EIZO for details.

Ultrawide, Curved Monitor for Information Volume

The 37.5-inch FlexScan EV3895 is an ultrawide, curved monitor with UWQHD (3840 x 1600) resolution for viewing a high volume of information easily on one spacious screen. This provides the option for operators to consolidate multiple applications or windows on one screen for a seamless viewing experience.

¹ Zero bright sub-pixels for six months from date of purchase.

With current LCD / OLED technology, a panel may contain a limited number of missing or flickering pixels.

If the monitor is left on continuously over a long period of time, dark smudges or burn-in may appear. To maximize the life of the monitor, we recommend the monitor be turned off periodically.

Sustainable Monitor Design

FlexScan Sustainable Monitors are at the forefront of EIZO's efforts to contribute to this sustainable future.

Case Studies

IP Decoding Solutions

Edmonton Transit (Canada)

Centralized Solution with VMS Integration

Edmonton Transit Service (ETS) is a public transit service that uses EIZO's IP decoding monitors integrated with the Genetec VMS to provide situational awareness to their patrons. Choosing a centralized solution allowed them to reduce the equipment needed across their stations, as well as do more remotely without needing to go out on site.

KDDI Corporation (Japan)

Monitoring Sites Remotely

To display surveillance camera images in their control center, KDDI installed DuraVision IP decoding boxes, as well as FlexScan 4K monitors for operators to use in the surveillance room. The IP decoding boxes are a straightforward way to simultaneously display multiple camera images from other sites without needing a PC. This means a simplified system that still met security standards while reducing management costs.

Kindred Health Transitional Care and Rehabilitation (USA)

Simplified Monitoring for Nurse Stations

With IP decoding monitors at each nursing station, nurses can easily monitor activity in hallways, parking lots, and entrances to provide optimal attention to patients and maintain a secure environment for their safety. Since the monitors are PC-less, this reduced the install time and number of hardware, software, and licenses needed for operation, resulting in a highly cost-efficient solution.

EIZO Corporation Factory (Japan)

Maintaining Visibility of Production Processes

EIZO installed its own IP decoding monitor and box solutions at its head factory in Japan for keeping eyes on production processes and ensuring employee safety. This allows EIZO to easily check on the safety of workers remotely, increase visibility of unmanned processes, and check progress for improved production efficiency.

Image Optimization System

FullDepth (Japan)

Enhancing Visibility of Images Captured by Underwater Drones

FullDepth installed EIZO's DuraVision EVS1VX image optimization system for enhancing images captured by underwater drones. Underwater images with poor visibility can be enhanced in real time, allowing the operator to inspect in detail, making it easier to find problem areas for repair in infrastructure facilities, such as pipe tunnels and dam surface structures.

Ultra-High Sensitivity HD Cameras

Hydro Technology Institute (Japan)

Clear Nighttime Visibility for Measuring River Flows

Hydro Technology Institute develops systems with advanced numerical analysis and cutting-edge AI, called Hydro-STIV, to measure the flow velocities and rates of rivers through video. They use EIZO's ultra-high sensitivity HD video camera to clearly observe rivers at night for a safer society.

Touch Panel Monitors

Daikin Industries (Japan)

Shifting to Paperless Meetings

As part of the company's shift to a paperless meeting system, Daikin Industries, a leading manufacturer of air-conditioners, installed EIZO's touch panel monitors into its Executive Conference Room. The spacious screen and glare reduction contributed to high readability. The intuitive touch operation made it easy to interact with the monitor.

Monitors for Operations Centers

Zurich Municipal Police (Switzerland)

Optimal View of Information at All Times

A team of officers-in-charge work at around the clock to monitor incidents and dispatch emergency services. FlexScan monitors ensure operators have an optimal view of everything at all times. Eye fatigue is significantly reduced due to the flicker-free, non-glare panel which is particularly important as full concentration is required constantly.

Kantonspolizei Aargau Headquarters (Switzerland)

Seamless Viewing Across Screens

At one of the world's most advanced emergency control centers, skilled employees run general emergency, police, fire, and ambulance departments 24/7. Four FlexScan monitors are installed side-by-side at each workstation. Ultra-slim bezels allow for seamless viewing from one screen to the next, minimizing neck and eye movement. Eye care technologies additionally work to combat eye fatigue for the operator.
